## Mobilphone industry wants to stop publication of the REFLEX-Study

I have just talked to Adlkofer in Greece. He is very pessimistic now, because the Mobilphone industry wants to stop publication of the REFLEX report.

Übersetzung Omega:

Die Mobilfunkindustrie will die Veröffentlichung der REFLEX-Studie verhindern

Ich habe gerade mit Adlkofer in Griechenland gesprochen. Er ist jetzt sehr pessimistisch, weil die Mobilfunkindustrie die Veröffentlichung der REFLEX-Studie verhindern will.

### REFLEX-Study

Risk evaluation of potential environmental hazards from low-energy electromagnetic field (EMF) exposure using sensitive in vitro methods

CORDIS RTD-PROJECTS/

[http://www.cordis.lu/en/src/g\\_021\\_en.htm](http://www.cordis.lu/en/src/g_021_en.htm)

European Communities.

Record Control Number: 51989

Quality Validation Date: 2003-04-01

Update Date: 2003-05-05

Project Acronym: REFLEX

Title: Risk evaluation of potential environmental hazards from low-energy electromagnetic field (EMF) exposure using sensitive in vitro methods

Subject Index: Environmental Protection; Life Sciences; Medicine, Health; Safety

Objective: Electromagnetic field (EMF) has become a topic of Europe-wide discussion. The latter has created uncertainty regarding possible adverse health effects for both the population and industry. Current research is characterized by conflicting data from epidemiological and animal studies, especially with respect to possible risk of cancer at different sites and neurological disorders. Clearly, mere continuation or replication of research, without introducing innovative concepts, will prolong the uncertainty as to whether EMFS do, or do not, represent a health risk. The results of this joint project, which will investigate molecular and functional responses of living cells to EMFS in vitro by applying state-of-the-art methods of molecular biology and toxicology, are needed urgently for molecular epidemiological studies, which are probably the only path to a reliable risk estimate for possible effects of EMFS on human health. Start Date: 2003-09-01 End Date: 2006-08-31

Duration: 36 months Project Status: Accepted Project Cost: 3.15 million euro Project Funding: 2.06 million euro Programme Type: 5th FWP (Fifth Framework Programme)
